

THIRSK TABLES

Manufacturers of complete tables and table components of all materials, shapes and sizes.

Made in North Yorkshire, delivered nationwide.

WHY BUY FROM US?

- British manufacturer and member of the Made In Britain campaign. No exchange rate issues; easy and convenient sales and after-sales service.
- Combined staff furniture manufacturing experience of over 300 years and the business was established in 1994.
- Quick, careful and cost effective delivery nationwide in our own vehicles.
- Reliable lead times – we liaise with you on lead times from the outset and always deliver on time.
- Low MOQs.
- High Quality. All our products are carefully Quality Controlled before being wrapped.
- A huge range of capabilities: we work with Laminates, Veneers, solid Hardwoods, Ply and Lino and have CNC and Polishing facilities in house. We make everything from coffee tables to lecture theatre writing ledges and from shelving units to 5 metre long hot desks.
- We don't compete with you. We have never supplied the end user and have no wish to.
- We are a carbon neutral company and only use hardwoods sourced from sustainably managed forests

OUR WORKSHOPS

Thirsk and the surrounding area has a rich history of furniture making – so much so there is even a 'Thirsk Furniture Trail'! We've been manufacturing tables from our workshops in Thirsk, North Yorkshire since 1994. In the last 12 years we have doubled the size of our premises which has allowed us both to increase our capacity and also to invest in the latest machinery which has significantly enhanced our capabilities.

OUR CAPABILITIES

Our workshops are divided into 3 key areas: Laminates and Veneers, Solid Hardwoods and Polishing.

Approximately 75% of our time is spent making table and desk tops, and the remaining 25% making frames and bases. In the hospitality market a lot of our tops are put on metal pedestal bases which can be brought in from our sister company The Tube Creation Company (more on them below).

Where hardwood frames or pedestals are required, we make these in house and the design of frames and bases we can offer is limitless. Often we are making a design for the first time to match a customer's drawing, but there is also a large range to choose from on our website.

Because workspace tables are a significant area of growth for us, we do offer 'standard' designs for these, which can be found on our website together with pricing.

LAMINATES & VENEERS

The choice of laminates and veneers we can work with is huge. We can source and work with laminate from any manufacturer including:

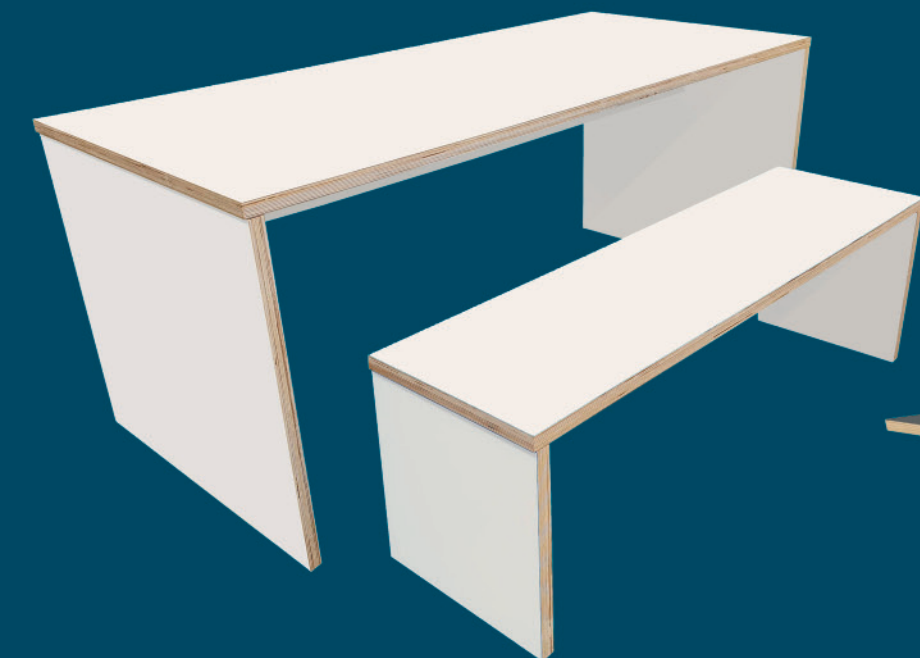

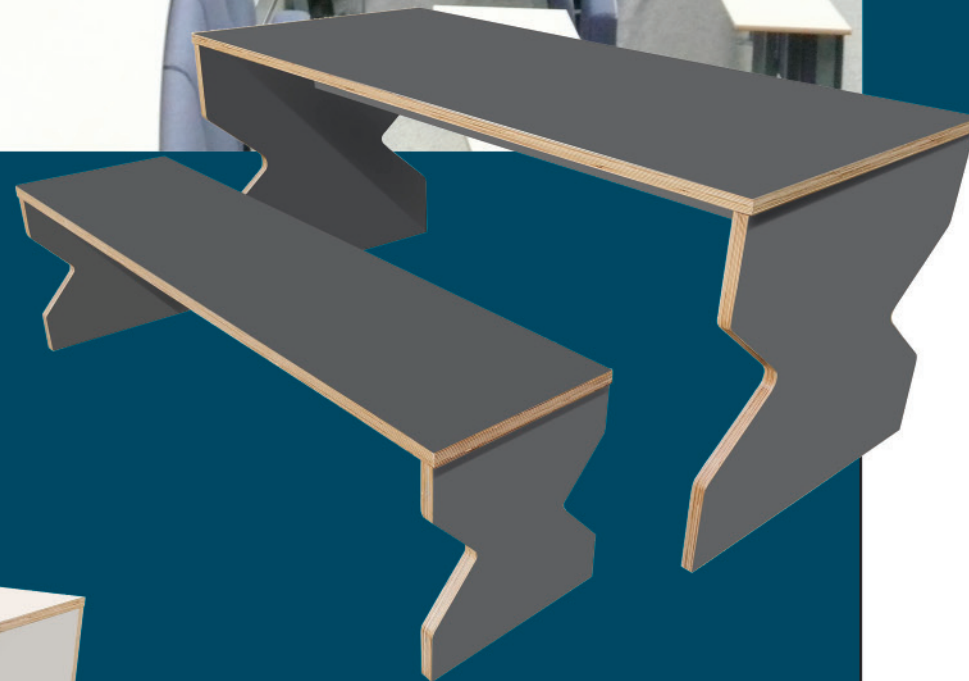

Unlimited selection

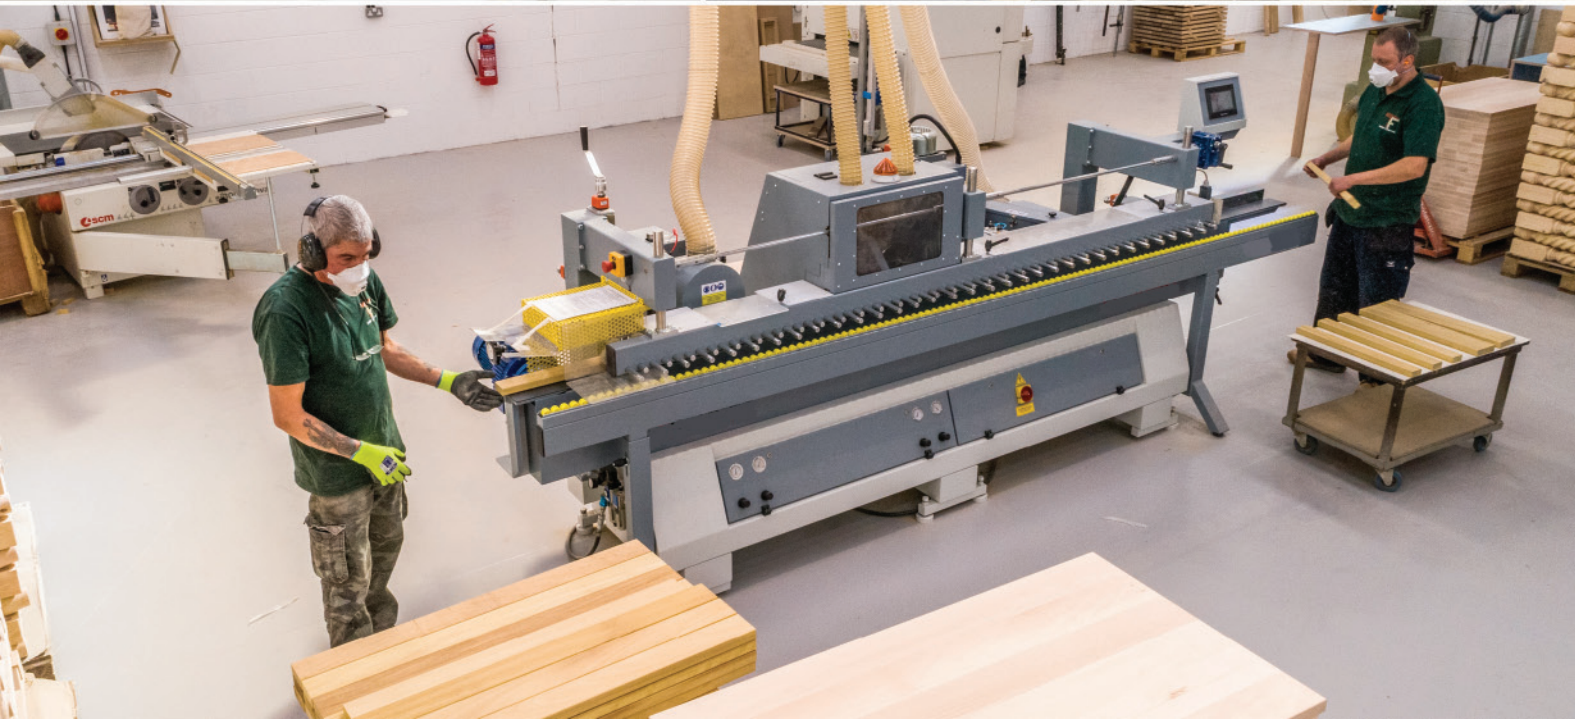

Likewise we can work with any veneer species (Oak, Ash, Walnut, Wenge etc). As well as standard commercial veneers, we can also source bespoke laid veneers, like this:

Laminate tops are normally edged with a PVC or ABS edge, often to match the laminate face. Unlike many of our competitors we are also able to edge with hardwood; anything from 2mm to 50mm wide and we can stain and polish the hardwood edge any way you need it.

This department also manufactures tops using Birch Ply, Lino, Marble, Granite, Tiles and more.

SOLID HARDWOOD

We make table and desk tops from any species of timber (normally hardwoods like Oak, or Ash), normally either 25mm, 32mm or 45mm thick.

We can make them any size or shape, from 350mm diameter stool tops, up to 6m x 1.2m meeting tables.

As well as table and desk tops, this department is where we also make hardwood frames, pedestal bases and frame components. Whether you want a complete table, just the frame or even part of a frame, we can help. As well as selling complete tables to furniture dealers we also work with other manufacturers to make hardwood components that they don't have their own capability, or capacity, to make.

CNC ROUTING

Using our Morbidelli Author 500 CNC router together with Genio programming software we can rout any shape in any material, vertically or horizontally drill panels and add edge profiles. This gives us huge scope to fulfil even your most bespoke requirements efficiently and to a high standard.

We frequently CNC rout power or data ports into table tops to our customer's design and can do this in any material. We can also shape tops to match any drawing.

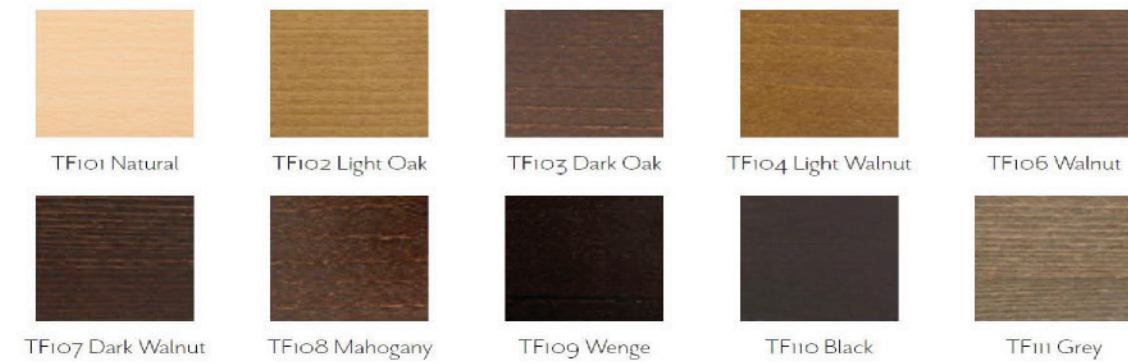

TABLE COMPONENTS

As well as table tops and table bases we're happy to make table components; perhaps a hardwood component that our customer will pair with some metal components. For example Oak legs that will be assembled with metal rails. Below are just a few examples:

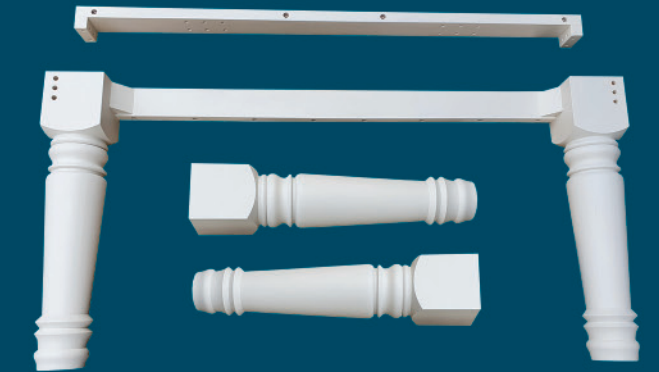

POLISHING

We have 2 in house spray booths in which we can finish our products to match any customer sample or to one of our own range of 10 woodstain colours. We can also paint products to match any RAL colour.

We can digitally print any logo or image:

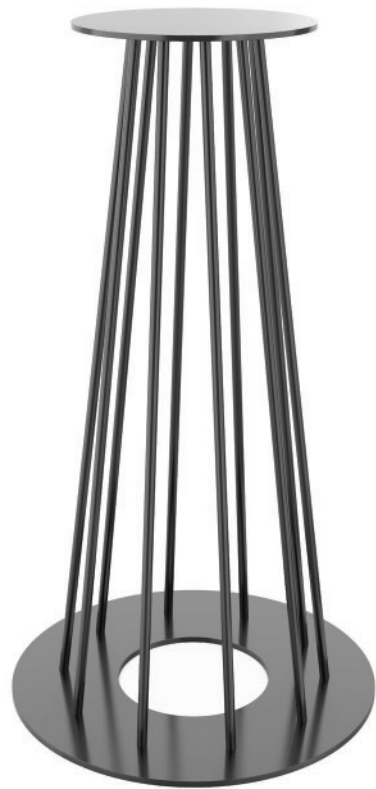

MARKETS

We supply into the following markets:

- Hospitality
- Office/Workspace
- Healthcare
- Education

METAL FRAMES **THE TubeCreation** COMPANY

Our sister company, The Tube Creation Company, manufacture fully welded and powder coated steel frames to both their own product designs and to customers' designs.

Together we can offer a multitude of products: from shelving units, to cage room dividers, to planters to credenzas. Oh, and the humble 4 legged desk too!
